DETAILED ACTION

Allowable Subject Matter

1. Claims 1,3-10,12-20 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

As per independent claims 1 and 10, the recited claim limitations pertaining to determining (and in effect, comparing) the spectral response of the speech signal against an intermediate reference signal (or modified intermediate reference signal) and further coding the speech signal to compensate for the intermediate reference signal (or modified intermediate reference signal) is not explicitly taught by the prior art of record.

Furthermore, it would not have been obvious to one of ordinary skill in the art of speech coding to modify the teachings of the prior art of record to obtain the recited limitations of claims 1 and 10 above.

With respect to the prior art of record, it is old and well known to provide some type of spectral compensation. For example, Jacobs et al (5778338) teaches compensation for spectrally flat parameters (Jacobs et al (5778338), col. 22, lines 5-19). However, the prior art record, nor Jacobs, explicitly teaches performing a comparison between reference spectral responses and the input speech, and then perform the spectral compensation, as claimed in independent claims 1 and 10 noted above.
